

StreamTask+ is a web-based application that enables you to master *the entire world* of your HCIS software updates: from managing the most detailed individual changes, to overall project management, issues tracking and functional and integrated testing.

The *StreamTask+* Advantage

StreamTask+ enables improved information sharing, communication, and standardization that spreadsheets can't provide.

- Share an accessible database of testing information and results
- Build, save and launch Testing Scripts for all aspects of the QA testing cycle
- Convert DTS documentation into a database of tasks for unit testing
- Stay informed through every stage of the update process with real-time status reports
- Enhance communication within the team, and with your software vendors
- Track issues throughout their life cycle with detailed documentation

Join us for a webcast demonstration of the newest features of StreamTask+ on Tuesday, June 11, 2013 at 2:00 pm Eastern/11:00 am Pacific

The webcast will run approximately one hour, and there is no charge to attend. Go to the [Contact Array](#) page on our website, email us at Information@arraysoftware.com, or call us at 413-789-2600 to register.
